## PROFILE

From the moment I produced 'Hello World' in the console of my first application, I knew I was hooked into the world of **software development**. Software development has never been 'just a job' for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software.

What started with a simple 'Hello World' has become a full-fledged **passion** that only gets more **exciting** as time goes by.
